Welcome to SeamXY

Redefining How People Discover Their Style

A look at our phase-one product strategy and the experience we're creating: personal styling powered by AI & human expertise, paired with meaningful, sustainable wardrobe tools.

This deck outlines our core product pillars, feature priorities, and UX/UI direction for the next stage of development.

The Onboarding Flow

Phase 01

Account Creation

Users can sign up with email, Google or Apple. Nothing complicated.

Phase 02

Style Quiz

The quiz should feel like a conversation rather than a long form. Think swipe cards, image grids, and small choices per screen.

Users can select body type based on illustrations provided.

Users can provide their own measurements with guide included (illustration or interactive video)

Phase 03

Photos, optional but encouraged

Mirror selfie upload
Pinterest mood board link
Closet photos
Option to skip and use AI only

Phase 04

Immediate AI Preview

After the quiz, users get:

A generated style board
A summary of their style identity
A few initial outfit examples
A recommended stylist (AI or human)

Unlock additional outfit examples for bonus ($) amount

Unlock more personalized option with human stylist

Style Quiz, Onboarding Flow

Style Identity

Style preferences (aesthetic, silhouettes, vibes)

Color preferences

Risk tolerance with fashion (classic, experimental, trendy)

Confidence goals (how they want to feel in their clothes)

Purpose: Helps AI and stylists understand the user's aspirational look and comfort zone.

Lifestyle Blueprint

Captures how the user actually lives and dresses day-to-day. Includes:

I. lifestyle needs (workwear, weekend, athleisure, nightlife, events)
II. Budget (overall range + per-item comfort level)

Purpose: Keeps outfits aligned with the user's real life - what they do, where they go, and what they are willing to spend.

Fit & Form Profile

Fit challenges (tight arms, short torso, long legs, etc.)

Height, weight range, and general body proportion

Purpose: Ensures recommendations are wearable, flattering, and realistic.

Style Boundaries & Dealbreakers

Clothing dislikes

Fabrics or silhouettes they avoid

Risk tolerance with fashion

Purpose: Helps the system filter out bad suggestions early, removing frustration and speeding up trust

The Style Dashboard

This is the main hub the user always returns to. It should feel like a personalized home screen.

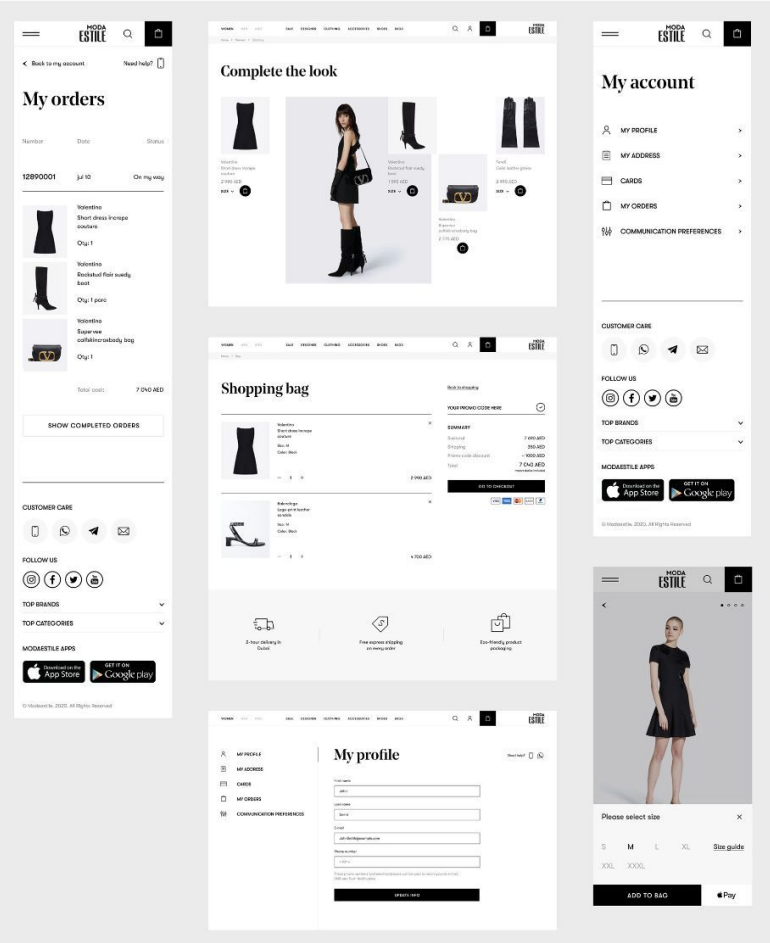
Main components:

I. A personalized lookbook
II. A queue of AI outfits (pay to unlock more)
III. Human stylist messages and recommendations
IV. Saved items
V. Shopping cart or shoppable list (affiliates)
VI. Closet view
VII. Personal goals and challenges

Visual tone:

I. Clean
II. Luxe minimalism
III. Warm neutrals
IV. No clutter

Think “Pinterest meets a well designed calendar app”.



Daily and Weekly Recommendations

This is the engine that keeps users engaged.

AI recommendations include:

I. Daily outfit ideas
II. Weather based picks
III. Event based picks (date night, work, brunch)
IV. Capsule wardrobe pieces

Human stylist recommendations include:

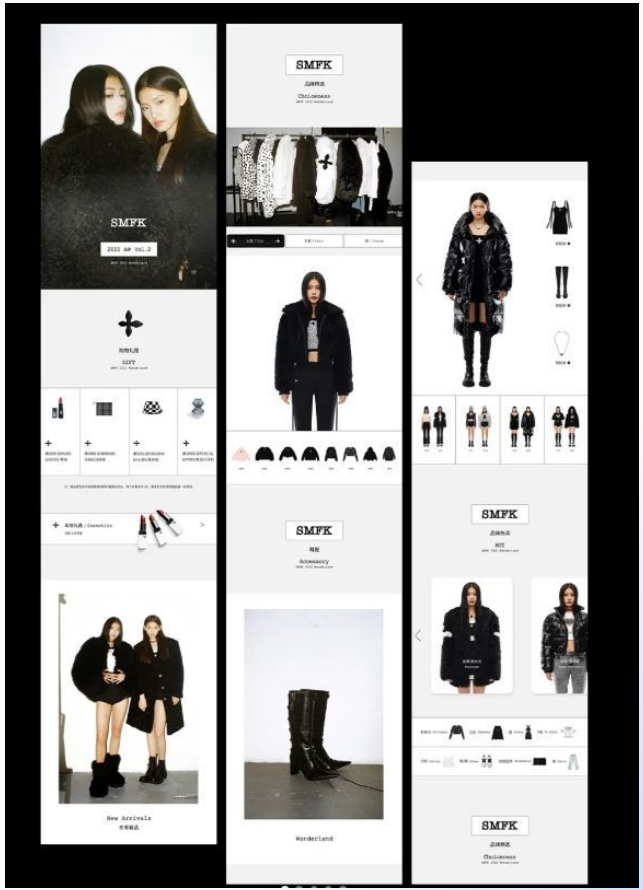
I. Curated outfits from marketplace items
II. Curated outfits from Pinterest boards (user-made)
III. Suggestions to elevate user style
IV. Voice note walk throughs
V. Seasonal wardrobe refresh lists

Key UI elements:

I. Tap to shop
II. Tap to save
III. Tap to swap item color or silhouette
IV. Tap to request an edit

Outfits should be collapsible cards with:

I. Items listed
II. Price range
III. Link to buy
IV. Notes from stylist or AI



AI Try On and Fit Logic

This is where users can visualize themselves in outfits. Think “virtual try-on”.

Two modes:

I. Try on with selfie
II. Try on with body measurement based model

Functionality:

- Users can see themselves in items
- They can rotate the model
- They can swap similar items
- They can see predicted fit

Closet Management

SeamXY helps users get more out of what they already own, reducing waste and promoting intentional shopping. The free AI tier focuses on reworking existing pieces, while the premium stylist tier curates only what's worth adding; creating a smarter, more sustainable wardrobe.

Free Plan: "Work With What I Have", AI Only

I. Limited closet upload
II. Basic AI outfit ideas
III. Weekly outfit cap
IV. AI identifies wardrobe gaps
V. Affiliate-linked recommendations

Paid Plan: "Style My Closet + Shop New Looks"

I. Unlimited closet uploads
II. Human stylist audit
III. Tailored shopping list
IV. Capsule wardrobe planning
V. 10-20 curated outfits monthly
VI. Stylist chat/consults
VII. Marketplace links

Purpose: promoting sustainability, soft open to those that want the service but can't fully invest in a complete, new wardrobe.
