Welcome to SeamXY

Redefining How People Discover Their Style

A look at our phase-one product strategy and the experience we're creating: personal styling powered by AI & human expertise, paired with meaningful, sustainable wardrobe tools.

This deck outlines our core product pillars, feature priorities, and UX/UI direction for the next stage of development.

The Onboarding Flow

Phase 01

Account Creation

Users can sign up with email, Google or Apple. Nothing complicated.

Phase 02

Style Quiz

The quiz should feel like a conversation rather than a long form. Think swipe cards, image grids, and small choices per screen.

Users can select body type based on illustrations provided.

Users can provide their own measurements with guide included (illustration or interactive video)

Phase 03

Photos, optional but encouraged

Mirror selfie upload
Pinterest mood board link
Closet photos
Option to skip and use AI only

Phase 04

Immediate AI Preview

After the quiz, users get:

A generated style board
A summary of their style identity
A few initial outfit examples
A recommended stylist (AI or human)

Unlock additional outfit examples for bonus ($) amount

Unlock more personalized option with human stylist

Style Quiz, Onboarding Flow

Style Identity

Style preferences (aesthetic, silhouettes, vibes)

Color preferences

Risk tolerance with fashion (classic, experimental, trendy)

Confidence goals (how they want to feel in their clothes)

Purpose: Helps AI and stylists understand the user's aspirational look and comfort zone.

Lifestyle Blueprint

Captures how the user actually lives and dresses day-to-day. Includes:

I. lifestyle needs (workwear, weekend, athleisure, nightlife, events)
II. Budget (overall range + per-item comfort level)

Purpose: Keeps outfits aligned with the user's real life - what they do, where they go, and what they are willing to spend.

Fit & Form Profile

Fit challenges (tight arms, short torso, long legs, etc.)

Height, weight range, and general body proportion

Purpose: Ensures recommendations are wearable, flattering, and realistic.

Style Boundaries & Dealbreakers

Clothing dislikes

Fabrics or silhouettes they avoid

Risk tolerance with fashion

Purpose: Helps the system filter out bad suggestions early, removing frustration and speeding up trust

The Style Dashboard

This is the main hub the user always returns to. It should feel like a personalized home screen.

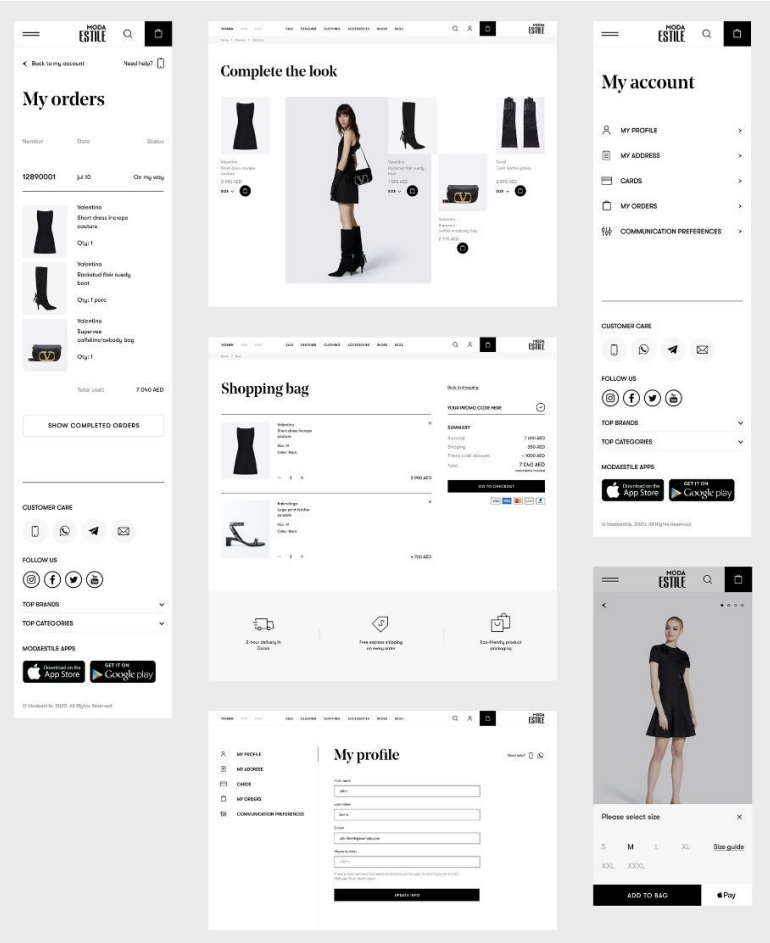
Main components:

I. A personalized lookbook
II. A queue of AI outfits (pay to unlock more)
III. Human stylist messages and recommendations
IV. Saved items
V. Shopping cart or shoppable list (affiliates)
VI. Closet view
VII. Personal goals and challenges

Visual tone:

I. Clean
II. Luxe minimalism
III. Warm neutrals
IV. No clutter

Think “Pinterest meets a well designed calendar app”.



Daily and Weekly Recommendations

This is the engine that keeps users engaged.

AI recommendations include:

I. Daily outfit ideas
II. Weather based picks
III. Event based picks (date night, work, brunch)
IV. Capsule wardrobe pieces

Human stylist recommendations include:

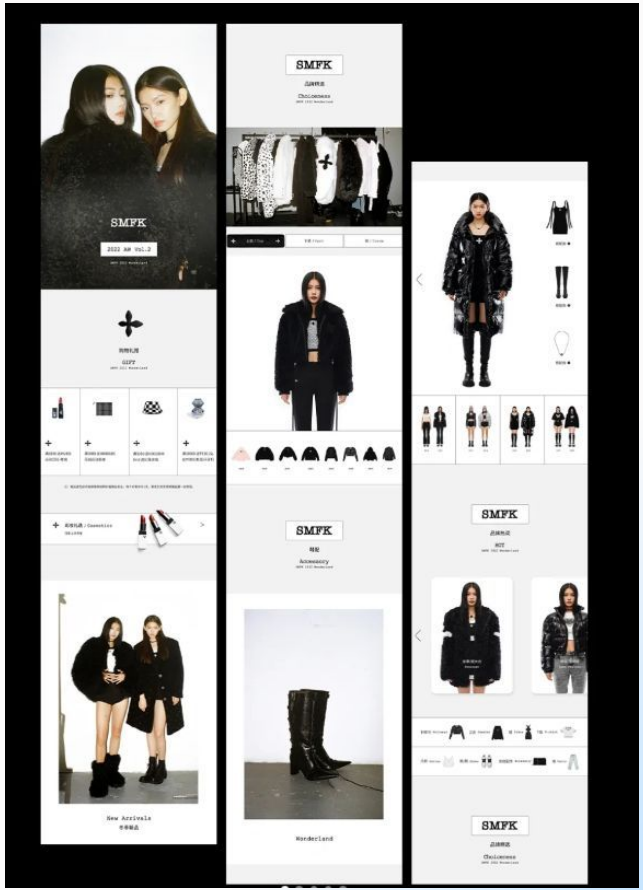
I. Curated outfits from marketplace items
II. Curated outfits from Pinterest boards (user-made)
III. Suggestions to elevate user style
IV. Voice note walk throughs
V. Seasonal wardrobe refresh lists

Key UI elements:

I. Tap to shop
II. Tap to save
III. Tap to swap item color or silhouette
IV. Tap to request an edit

Outfits should be collapsible cards with:

I. Items listed
II. Price range
III. Link to buy
IV. Notes from stylist or AI



Pinterest Integration

Connect Pinterest boards directly to user's style profile. Our AI instantly analyzes their saved inspiration: colors, silhouettes, aesthetics and turns it into tailored outfit recommendations. Human stylists receive visual context and AI summaries that help them deliver accurate, personalized styling with less back-and-forth. This feature removes friction, speeds up onboarding, and makes style personalization feel natural and familiar.

What the User Can Do

I. Log in with Pinterest
II. Select one or multiple boards
III. Instantly pull in all images from those boards
IV. Auto-tag imported images based on: style category, colors, silhouettes, aesthetics, fashion eras (e.g., minimalist, streetwear, luxury)

The imported boards appear directly in their style dashboard and become part of their ongoing profile.

How the AI Uses the Pinterest Data

I. Dominant color palette
II. Favorite silhouettes (oversized, tailored, fitted)
III. Recurring themes (sporty, romantic, classic, luxe)
IV. Outfit structure (simple basics vs. high-concept looks)
V. Lifestyle cues (nightlife, travel, workwear, athleisure)

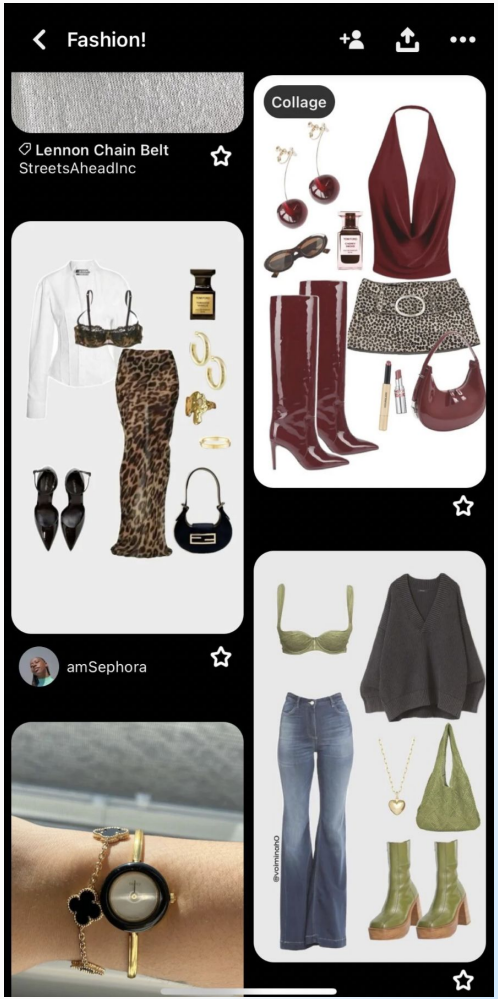
The AI produces recommendations that "feel like the user" without a long manual quiz.

How Human Stylists Benefit

Stylists get a moodboard snapshot before the session begins, including:

I. Visual inspiration in one place
II. AI-generated summary of the user's aesthetic
III. Do/Don't preferences extracted from the Pinterest board
IV. Predicted gaps in their wardrobe

This reduces stylist prep time and improves accuracy.



AI Try On and Fit Logic

This is where users can visualize themselves in outfits. Think “virtual try-on”.

Two modes:

I. Try on with selfie
II. Try on with body measurement based model

Functionality:

- Users can see themselves in items
- They can rotate the model
- They can swap similar items
- They can see predicted fit

Closet Management

SeamXY helps users get more out of what they already own, reducing waste and promoting intentional shopping. The free AI tier focuses on reworking existing pieces, while the premium stylist tier curates only what's worth adding; creating a smarter, more sustainable wardrobe.

Free Plan: "Work With What I Have", AI Only

I. Limited closet upload
II. Basic AI outfit ideas
III. Weekly outfit cap
IV. AI identifies wardrobe gaps
V. Affiliate-linked recommendations

Paid Plan: "Style My Closet + Shop New Looks"

I. Unlimited closet uploads
II. Human stylist audit
III. Tailored shopping list
IV. Capsule wardrobe planning
V. 10-20 curated outfits monthly
VI. Stylist chat/consults
VII. Marketplace links

Purpose: promoting sustainability, soft open to those that want the service but can't fully invest in a complete, new wardrobe.

Marketplace Integration

Concept: Curated Finds for You

Users receive outfit recommendations via AI or human stylist

Options to “Shop New Looks” or “Work With What You Have”

Purchases are made through affiliate links - no inventory needed

User Interaction: Seamless Shopping Experience

Clickable product tiles with price, size and affiliate tag

Wishlist/favorites sync back to dashboard

Smooth transition from recommendations to vendor checkout

Recommendation Flow: Smart Styling Meets Shopping

AI Recommends items based on quiz + wardrobe data

Human stylists can swap in premium/curated items

Recommendations highlight style gaps and opportunities

Monetization & Incentives: Win-Win for Users and Stylists

Company earns commission per affiliate purchase

Stylists may earn bonus or commission for converting recommendations

Optional tagging: sustainable, eco-friendly, or trend-focused items

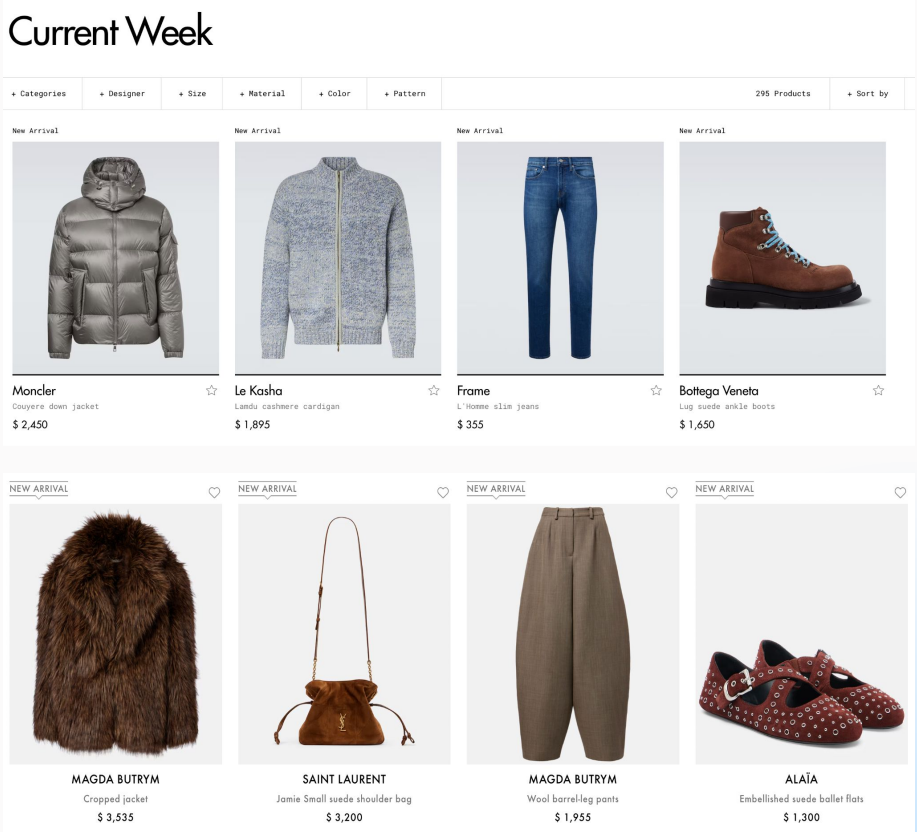
Marketplace Aesthetic

I. **Overall Look**
Elevated, minimal, premium. A clean visual language with intentional whitespace that feels refined and modern. The mood is quiet luxury with a focus on clarity, softness, and high taste.

II. **Color Direction**
A restrained palette built around neutrals. Think warm ivory, soft cream, bone, charcoal, and muted gold accents. Colors should feel expensive, calm, and consistent across digital and print.

III. **Typography**
Elegant high contrast serif for headings paired with a clean geometric or humanist sans serif for body text. The combination should communicate sophistication and confidence without feeling busy.

IV. **Layout Style**
Structured and spacious. Generous margins, centered or left aligned compositions, clear hierarchy, and strong grid discipline. The design should feel airy and balanced.



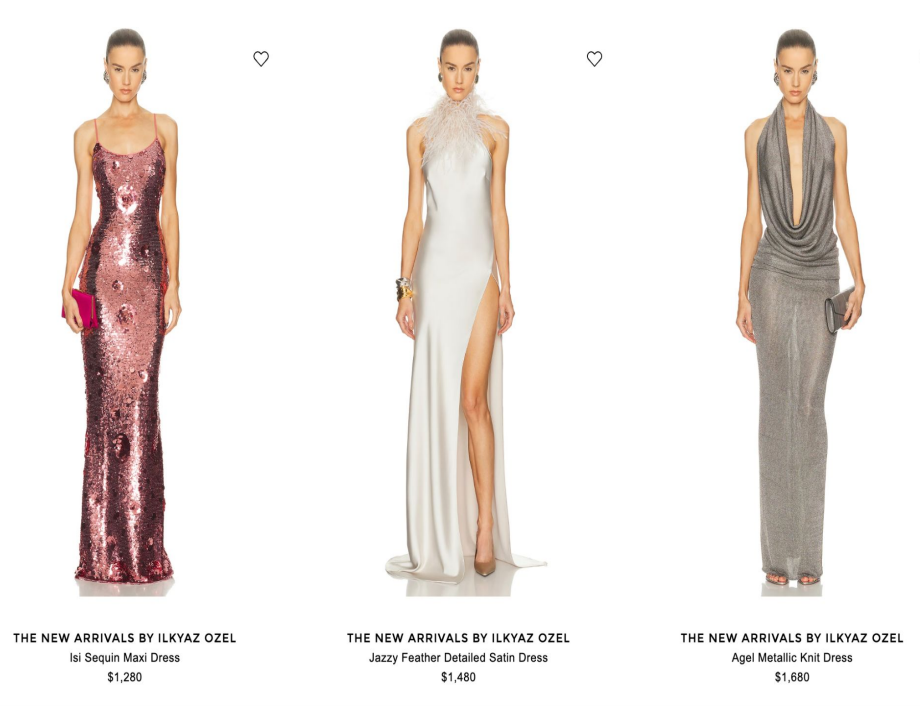
Marketplace Aesthetic, cont.

I. **Brand Feel**
Modern, editorial, polished. Every element should feel deliberate and thoughtfully placed. The tone is confident but understated. Luxury should come from restraint, not decoration.

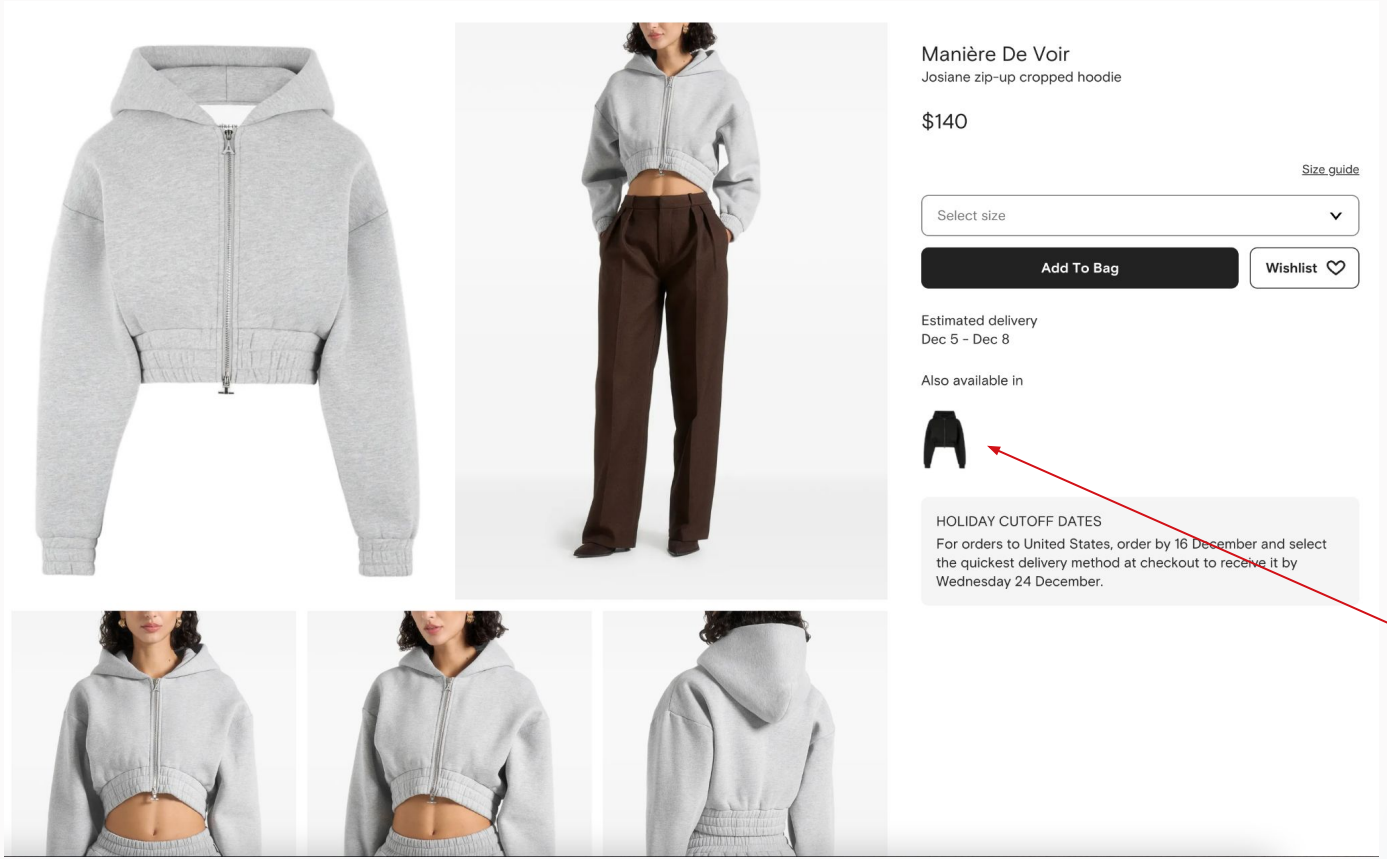
II. **Texture and Detail**
Flat, crisp surfaces with subtle highlights. No heavy patterns or noisy elements. Minimal embellishment to maintain a premium feel.

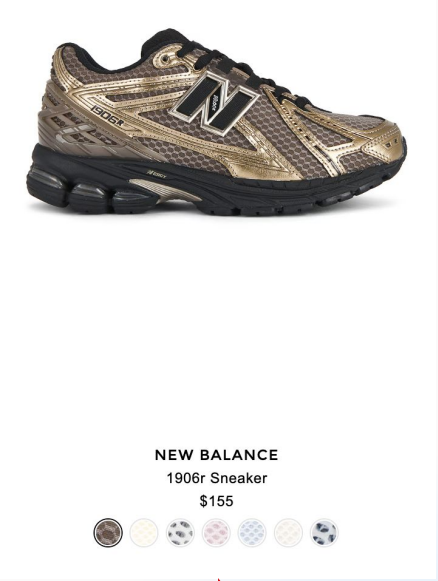
III. **Product Presentation**
Clean backgrounds, sharp lighting, and uncluttered framing. Items should feel curated and aspirational. The focus should always be on quality and detail.

IV. **Personality and Tone**
Refined, articulate, selective. A brand that knows exactly who it is and makes choices with intention. Messaging should sound premium, clear, and elevated.



Marketplace Additional Features





Allow users to view additional color options with a hover feature, or shown within the individual listings.
